

REMARKS

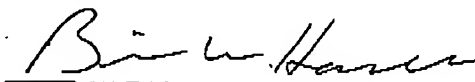

Claims 1-14 are pending, Claims 1-14 are rejected. By the present Amendment, Applicant amends the claims.

In the Advisory Action, the Examiner maintains the previous rejections indicating that the prior art Willner (US 4,821,739) still anticipates the claims. The Applicant previously argued that Willner does not disclose the use of rigid iliac rolls. The Applicant contends that by definition, iliac rolls are rigid. However, the Advisory Action considers that the flexible straps disclosed in Willner meet the definition of iliac rolls due to the positioning of the straps on top of the pelvis bone.

To overcome the rejections, the Applicant has specifically defined the iliac rolls as being rigid, in the claims. This feature is not disclosed by Willner. Therefore, the Applicant respectfully requests that the rejections be withdrawn.

In light of the foregoing response, all the outstanding objections and rejections have been overcome. Applicant respectfully submits that this application should now be in better condition for allowance and respectfully requests favorable consideration.

Respectfully submitted,

October 19, 2004
